EDUCATION

Vellore Institute of Technology

B.Tech in Electronics and Communication Engineering (ECE)

CGPA: 8.60

Sep 2023 - May 2027

TECHNICAL SKILLS

- **Programming:** Java, Python, C++, C, SQL, JavaScript
- **Data Structures & Algorithms:** Advanced Java-based DSA, Competitive Programming
- **Backend :** FastAPI, Express, REST APIs, GraphQL,Render
- **AI & Automation:** LLM Prompt Engineering, AI Pipeline Integration, n8n automation, Machine Learning
- **Databases:** MySQL, PostgreSQL, MongoDB, Airtable, Neon
- **DevOps & Tools:** Postman, Docker, Git, JWT Auth
- **Core Concepts:** Object-Oriented Programming (OOP), System Design, Decentralized Networks, Signal Processing, Operating System, unit testing, technical documentation
- **Soft Skills:** Problem solving, teamwork, debugging, leadership, communication
- **Design Tools:** Adobe Photoshop, Canva, Figma

PROFESSIONAL EXPERIENCE

Kofuku Technologies Pvt. Ltd. (Software Engineer Intern)

On-Site

May 2025 - Jul 2025

- Developed scalable backend APIs using Python and FastAPI, increasing internal tool reliability and reducing API failure rates by an estimated 30%.
- Automated multi-application workflows with n8n, eliminating 8-12 hours/week of manual coordination across teams.
- Designed and deployed an anonymous Confession Platform used by 150+ internal users; enabled behavioural analytics for product research and improved survey participation by 40%.
- Built a production-ready voice-AI facility booking system integrating speech-to-text and scheduling logic, reducing booking friction by 60%.
- Delivered full-stack systems including a Netflix Clone and an AI-driven Instagram Influencer Tracker, improving internal testing velocity by 35%.
- Enhanced Kofuku Social backend by refining admin flows, updating documentation, and reducing QA rework cycles by 20%.

HACKATHONS & CERTIFICATIONS

Central Hack (Leveraging Web3 Crisis Protocols)

Runner-Up

Providence Leap Ideathon (AI-Driven Healthcare Benefit Orchestration)

Runner-Up

Certifications

- **MATLAB OnRamp (2024)** - The MathWorks, Inc.
- **Statistics OnRamp (2024)** - The MathWorks, Inc.

PROJECTS & RESEARCH

MS-HQNet: Multi-Stream Hybrid Quantum Framework

- Introduced a Hybrid QCNN classifying 600 EMG signals with 99.17% accuracy by pairing a 6-qubit quantum circuit with a classical MLP bypass, and constructed a data pipeline using SM-SSA and NCA to distill 260 temporal features into 64 optimal vectors

ResiliNet - Decentralized 6G Network Simulator

Link

- Architected a simulation framework for decentralized 6G networks proposed on modern software architecture, modeling node resilience and dynamic data routing to optimize bandwidth and achieve significant reductions in packet loss during targeted node failures

Netflix Clone - Full-Stack OTT System

Link

- Orchestrated a production-grade OTT platform leveraging React.js, Express, and Docker with a robust MySQL schema, implementing secure JWT authentication and optimized API queries that reduced login latency by 25% and improved video load times

Anonymous Confessions Platform – Full-Stack Cloud System

Link

- Engineered a full-stack React and Node.js platform from scratch, architecting a PostgreSQL (Neon) schema and RESTful API to handle secure data persistence and production-grade SSL cloud deployments.

Facility Booking System - Voice-AI Integration

Link

- Deployed an intelligent booking system incorporating AI-driven speech-to-text for hands-free reservations, integrating real-time calendar synchronization and complex rule-based logic to accelerate resource booking by 50% and eliminate double-booking

LEADERSHIP / EXTRACURRICULAR

SAE-VIT (Marketing, Design & PR Head)

May 2024 - May 2026

- Directed branding strategy reaching 1,000+ students and mentored 20+ members in design standards and operations.
- Led execution for **12 major graVITas'25 events** and served as POC & Operations Manager for **SAE AirShow 25**, coordinating **40+ volunteers**, plane/drone logistics, and safety workflows, increasing overall participation by **30-45%**.

CodeChef VIT (Core Member)

May 2024 - Jun 2025

- Hosted competitive programming contests for **300+ participants**, managing problem-setting and test case validation, and created automated leaderboards & evaluation scripts to reduce result processing time by **70%**.

IEEE VIT (Core Member)

May 2024 - Jun 2025

- Led workshops on embedded systems and Python for 200+ students; mentored teams on debugging and project planning.
